

Artex

Public Entity Pools

Artex offers full-service treasury, accounting and finance functions for public entity risk pools

We provide these services both as part of Risk Pool Administrators (RPA), which provides administrative and consultative services for public sector risk pools, and on a stand-alone basis. We keep the risk pool running smoothly, and provide timely, readily available and clear financial information.

We offer

- › Full general ledger service, including accounts payable and accounts receivable functions, treasury and cash flow management, and reporting
- › Quarterly or monthly financial statements that present the financial condition of the pool
- › Reports for our stakeholders so they can stay informed of the pool's financial activities

The Artex staff includes certified public accountants and other professionals with self-insurance, insurance and risk pool experience. Our staff will work with the outside actuaries, auditors, third-party claim administrators (TPAs), investment advisors and the program administrator to keep the risk pool in regulatory compliance.

Whether you're interested in having us place business in RPA or provide treasuring services to an existing pool, Artex has the financial solutions you need to manage public entity pools.

Benefits of risk pooling

- › Protection from catastrophic claims by joining an insurance risk pool
- › Law of large numbers - losses become more predictable as you share losses with others.
- › Increased risk distribution as the pool exposes participants to a variety of risk

The Artex Advantage

Artex provides a full range of financial, treasury, risk pooling and alternative risk management solutions, customized for our clients' individual challenges and opportunities. Powered by independent thought and an innovative approach, we empower our clients and partners to make educated risk management decisions with confidence. Operating in over
